- 6) ☒ Claim(s) 1-4 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All    b) ☐ Some \*    c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
  3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

**DETAILED ACTION**

Applicant is requested to draw a clear line of demarcation between the present application and applicant's related application 10/768,501 which also claims a similar quick connect type connector and clip for verifying complete connection wherein the connection clip includes opposite clip portions verifying portion of specified length corresponding to the distances of an annular engagement projection and an annular verification projection on the tube and including reinforcement ribs.

**Drawings**

The drawings are objected to because figs. 1-4 should be labeled as prior art as they do not appear to be directed to the invention as claimed but rather to a known quick connect coupling as alluded to.

**Claim Rejections – 35 USC § 102**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. § 102(b) as being anticipated by Japanese patent 11-6591. The Japanese patent illustrates the present invention with tube 1 having an annular engagement projection 22 and an annular verification projection 23. The tube fits into the female connector 10 and is sealed therewith via seals 15,16 and retained therein via retaining means 32. Further a clip body 40 is presented having opposite U-shaped clip portions 42 and 43 for verifying correct connection of the tube within the female coupling. As shown in comparing figs. 1 and 2, if properly connected the clip body will be allowed to slide down in a direction "X" perpendicular to the central axis of the coupling (fig. 1) and if not properly connected the clip will not be allowed to move in direction "X" such as shown in fig. 2. The figures of the Japanese patent compare with figs. 20 and 21 of the present invention and illustrates the dimensional relationship between the clip portions and the projections of the tube. Further, the clip is provided with reinforcement ribs 46a and snap-fit portions 44c as shown in fig. 3.
